

Cakeify – Custom Cake App

Role: UI/UX Designer | **Platform:** Mobile App | **Tool:** Figma

Project Overview & UX Process

1. Overview / Project Summary

Cakeify is a mobile app that allows users to customize cakes step-by-step, submit their order directly to a baker.

Role: UI/UX Designer (Beginner)

Tool Used: Figma

2. Problem Statement

- Users face confusion while ordering customized cakes due to unclear options
- Lack of flexible customization options leads to poor user satisfaction.
- Users want transparent pricing and easy communication with bakers.

3. Goal

- Design a step-by-step, intuitive cake customization experience.
- Ensure transparent pricing updates in real-time.
- Allow optional steps for flexibility.
- Provide clear order confirmation and estimated delivery time (2 days in advance).

4. Target User / Persona

Name: Saleha Tariq

Age: 21, Undergraduate Student

Goal: Easily customize and order cakes for events

Pain Points: Confusing options, hidden costs

Solution, UI Screens & Outcome

5. Key Features

- Step-by-step cake customization
- Optional Skip buttons on toppings / text steps
- Suggestion boxes at every step
- Real-time pricing updates
- Order confirmation with estimated delivery (2 days in advance)

6. Design Decisions

- Suggestion Boxes: Allow users to add personal preferences.
- Skip Buttons: Optional steps reduce friction for users who don't want full customization.
- Step-by-Step Flow: Reduces cognitive load.
- Estimated Delivery: Orders must be 2 days in advance; displayed in Review & Confirmation screens.

7. UI Screen (User flow)

Home

The Home screen features a large circular image of a decorated cake at the top. Below it is the 'CAKEIFY' logo in a bold, purple font. A subtitle reads: 'Create your dream cake in a few easy steps. Freshly baked, personalized, just for you.' Below this is a button labeled 'Customize your Cake' and a prominent 'Let's start' button with a small cake icon. At the bottom, it says 'Delicious moments start here'.

Customization Step

This screen is titled 'step 1/6' and 'Choose Your Cake Base'. It instructs the user to 'Select the flavor and size of your cake.' Under the 'Flavor' section, there are four buttons: 'Chocolate', 'Vanilla', 'Strawberry', and 'Red Velvet'. Under the 'Size' section, there are three buttons: '1lb', '2lb', and '3lb'. Below these is a text input field for 'Any preference for sweetness or texture?' with a 'submit' button. At the bottom are 'Cancel' and 'Next' buttons.

Review Screen

The Review screen is titled 'step 6/6' and 'Review Your Cake'. It asks the user to 'Check your selected options and see the total price before placing the order.' It lists the following items with their prices: 'Cake Base & Size' (Chocolate - Rs. XXXX), 'Shape' (Round - Rs. XXXX), 'Layers & Flavors' (2 | Cream - Rs. XXXX), 'Frosting & Toppings' (Buttercream - Rs. XXXX), and 'Custom Text / Design' (NULL - Rs. 0). The 'Total Price' is shown as 'Rs. XXXX'. At the bottom are 'Edit' and 'Confirm' buttons.

Confirmation Screen

The Confirmation screen is titled 'Order Confirmed!'. It states: 'Your custom Cakeify order has been sent to the baker. Enjoy your delicious cake!'. It displays a box with the following details: 'Order ID 123xx', 'Total Price Rs. XXXX', and 'Estimated delivery time 2 days from today'. Below this is a text input field for 'Add any notes for the baker (optional)' with a 'submit' button. At the bottom is a 'Thank you for ordering!' message.

8. Outcome / Results

- Clearer cake customization process
- Better user-to-baker communication
- Positive user experience and usability
