

Cakeify – Custom Cake App

Role: UI/UX Designer | **Platform:** Mobile App | **Tool:** Figma

Project Overview & UX Process

1. Overview / Project Summary

Cakeify is a mobile app that allows users to customize cakes step-by-step, submit their order directly to a baker.

Role: UI/UX Designer (Beginner)

Tool Used: Figma

2. Problem Statement

- Users face confusion while ordering customized cakes due to unclear options
- Lack of flexible customization options leads to poor user satisfaction.
- Users want transparent pricing and easy communication with bakers.

3. Goal

- Design a step-by-step, intuitive cake customization experience.
- Ensure transparent pricing updates in real-time.
- Allow optional steps for flexibility.
- Provide clear order confirmation and estimated delivery time (2 days in advance).

4. Target User / Persona

Name: Saleha Tariq

Age: 21, Undergraduate Student

Goal: Easily customize and order cakes for events

Pain Points: Confusing options, hidden costs

Solution, UI Screens & Outcome

6. Key Features / Solution

- Step-by-step cake customization
- Optional Skip buttons on toppings / text steps
- Suggestion boxes at every step
- Real-time pricing updates
- Order confirmation with estimated delivery (2 days in advance)

7. Design Decisions / UX Choices

- Suggestion Boxes: Allow users to add personal preferences.
- Skip Buttons: Optional steps reduce friction for users who don't want full customization.
- Step-by-Step Flow: Reduces cognitive load.
- Estimated Delivery: Orders must be 2 days in advance; displayed in Review & Confirmation screens.

8. UI Screen (User flow)
